OCTOBER 2024

Colorectal course: 21st and 22nd

NOVEMBER 2024

Basic course: 4th to 7th

Introduction

Course dedicated to radical Cystectomy with intracorporeal derivation Robot Assisted. The course includes theoretical and practical sessions in groups with particular focus on intracorporeal reconstruction and cystectomy techniques with functional preservation. The students will have the opportunity to follow the methods of experienced surgeons and compare their technical differences by trying on live animals the model techniques of intestine manipulation in endoscopic reconstruction of neobladder or ileal duct in relationship to individual skills.

DAY 1 - Monday 1st July
